Note from the DON, Kristi Burger

You can catch pneumonia from a cough or close contact anytime of the year. If you are 65 or older you are 10x more likely to contract pneumonia. If you have a diagnosis of diabetes, heart disease, COPD, or are over 65 years of age it is recommended that you receive a pneumococcal vaccine. Contact your physician to find out what vaccines are recommended for you or I can help. In the meantime, you can practice good hand washing, stay active, and eat a balanced diet. We do ask that if you are visiting and have any symptoms of illness at all that you wait until you are feeling better. In an effort to be proactive, we have stocked up on hand sanitizer and face masks early this year. We have also partnered with Circle Drug for Pneumococcal vaccines that are now available for all of our residents. If our residents have any interest in obtaining this vaccine, we can arrange a pneumonia shot clinic

like we did with the flu vaccine. Please let me or Alicia know if you are interested.
