Beginning at the End

“New year, new me” is a common refrain on January 1. For many, the start of a new year presents the opportunity for a restart. You know what that means: dreaded new year’s resolutions. Some promise to start healthy habits like eating right and exercising. Others open new bank accounts or resolve to save more money. The boldest decision-makers might embark on life-changing journeys: a move to a new city, a decision to have a baby, or opening a new business. But just because it’s the start of a new year doesn’t mean everybody wants a new beginning. In fact, some people want just the opposite.

Zack, Zoe, and Zeke might remind you that January 1 is Z Day, a day to ditch beginnings altogether and start at the end. So many things in life are organized according to the alphabet, leaving those with Z names waiting until the end for their opportunity to shine. Sure, today is a day to give Zane and Zelda a little extra attention, but it is also a day to reverse your order of thinking. Instead of prioritizing the usual resolutions, give some attention to the items at the bottom of the list, the stuff that so often gets ignored, like trying a new hobby, donating your wedding dress to Goodwill, or even cleaning the garage.

If you find resolutions to be a chore, have no fear: January 17 is Ditch New Year’s Resolutions Day. After keeping up the charade for a couple of weeks, exercising when you don’t want to, and eating healthful but unappetizing foods, this is a day to be honest with yourself if you’ve set unrealistic or unattainable goals. Skip the workout, grab a bowl of ice cream, and retool your resolutions to make them more manageable and enjoyable! Remember, January wasn’t always a month for reinvention and rebirth. January and February were the last months to be added to the calendar, falling after December. For centuries, March was used as the time of annual renewal. It wasn’t until 153 BC that the Romans decreed January 1 the new New Year, and some countries still didn’t adopt the date until the 18th century.

The Best Medicine

On January 24, at 1:24 p.m., be sure to let out a great big laugh, for it is Global Belly Laugh Day. Laughter truly is the best medicine. Research shows that laughter is a proven stress-reducer. It stimulates circulation and promotes muscle relaxation. It also acts as a short, full-body workout. The quick influx of oxygen stimulates your lungs, heart, and muscles, and increases endorphins released by the brain. Laughter even prompts the release of body chemicals that relieve pain and boost our immune systems. The only question that remains is, “How do I make myself laugh at exactly 1:24 p.m.?”

Most of us know what makes us laugh. Put on a favorite funny movie or television show. Share a funny story from your past with friends. Dress up in a funny costume and entertain your buddies. And if you still don’t crack a smile, don’t worry. Even fake laughter provides health benefits! Our bodies do not know the difference between fake laughter and spontaneous laughter. Perhaps this is why laughing clubs, where groups get together and force belly laughs out loud, are so popular in India?

New Year’s Around the World

Americans often use fireworks to celebrate New Year’s, while Puerto Rican children throw water out of their windows at midnight on New Year’s Eve to rid their homes of evil spirits. In France, a stack of pancakes is eaten for luck and good health. In Spain, it’s traditional to eat 12 grapes at midnight—one for each strike of the clock and month of the year. What’s your family’s New Year’s tradition?

Novelty Acts

January might be International Brain Teaser Month, but no matter the time of year and no matter our age, our brains love to be teased! Brains are built to enjoy the novelty of a wide variety of challenges. Attempts to overcome those challenges keep our brains limber and help slow age-related cognitive decline. Whether it is a puzzle like a sudoku or a crossword, a mental challenge like a riddle or logic puzzle, or a device like a Rubik’s Cube, it is beneficial whenever we force our brains to overcome a task or learn something new.

Our brains find *novelty*, or the quality of learning something new, original, or unusual, powerfully attractive. Novelty is not just related to new games or overcoming unique tasks. Newness takes many forms—hearing a new song, buying a new outfit, traveling to a new place—and is almost always accompanied by a rush of dopamine to the brain. Through this chemical rush, novelty makes us happy. Yet, as soon as a song gets overplayed, an outfit becomes outdated, or a new place becomes familiar, we find ourselves restless, seeking novelty once again. Brain teasers often offer our brains tiny daily doses of novelty.

The crossword puzzles and sudoku found in the daily news certainly challenge our creative thinking, but even these can become routine and lose their novelty. This is why experts believe it is best to challenge your brain with different types of brain teasers. Learning a new board game is one type of challenge. Trying a new sport, practicing a new hobby, or even attempting to learn a musical instrument is another type of brain teaser. Furthermore, trying something new with a group of friends stretches your brain even more because now you must not only overcome a new challenge but also navigate social dynamics. The science is clear that there is no single type of brain teaser that will keep our brains young and sharp. Luckily, society offers an almost infinite variety of experiences that offer novel challenges to our hungry brains.

Our Philosophy

Giving new meaning to Life

The Arbor House Philosophy is based on the belief that each resident is entitled to the highest quality of life through wellness services that work to promote independence, healthy lifestyles, dignity, and a sense of security.

The right of each resident to determine his/her need is respected at each level of care, and promoted by providing services in ways that recognize individuals needs and preferences.

A partnership exists between residents and staff to promote individual's independence while providing the necessary support to function at his/her highest level.

Flower of the month-

Carnation

The carnation is the flower for January. Also known as a clove pink, this versatile flower is a species of the genus *Dianthus*, a term that means "divine flower" in Greek. Carnations are native to the Mediterranean and have been cultivated for over 2,000 years. The festive, sweet-scented blooms were used in ancient Greek and Roman ceremonial crowns and now come in a rainbow of colors, including pink, purple, blue, yellow, green, orange, white, and striped.
